### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

None of prior art teaches that a touch pad to be attached to an electronic apparatus comprises a touch pad, a unit case for supporting an outer circumferential portion of the touch pad via a suspension to provide a space for sound emission between the case and the touch pad, and an electromechanical acoustic transducer for emitting sound into the space, as specifically claimed in claims 1 and 7, wherein the electromechanical acoustic transducer is connected to the case and emits the sound into the space, and wherein the energy of the sound emitting from the acoustic transducer causes the touch pad to vibrate and thereby to output sound outside the electronic apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Azima et al. (US 2001/0026625) shows the touch pads on a resonant panel.

Bank et al. (US 2003/0059068) teaches a touch pad assembly for use in an electronic article.

Art Unit: 2643

Azima et al. (U.S. 6,590,799) teaches a loudspeaker that comprises a panel being integral with a touch pad and a pair of exciters.
